

Emulsified oil-water can be easily separated. Emulsions Removal Tank.

💧 **Is not it troubling with such a thing?**

- Oil film floats on drainage.
- I would like to review the cost of oil water treatment.
- I want to reduce waste.
- I want to reuse water and oil
- The load on the final treatment tank is high
- Etc .

Please leave it to the REM system

- Mineral oil, vegetable oil, animal oil, regardless of type.
- Adsorb and remove fine emulsion.
- It's compact and easy to install.
- We can process a large amount at a reasonable price.

REM Powder

Oil water separating agent is urethane type powder.

■ **REM Tank** Use pump to send oil-water to tank. That's it.

Patent acquisition jp-6132630

💧 **Emulsified oil water separation is one pass!**

- Processing speed 100 L/min
- Meets sewage discharge standards: n-hexane 5mg/l
- De-oiling machine squeezes whole basket for endless recycling

Please look at the video from the website

Release convenient horizontal type for piping

NEW

■ **REM Swing**

Dedicated de-oiling machine

💧 **Squeezes spent oil-water separator for recycling**
